on future occasions - If used appropriately, the result of the assessment is independent of the practitioner - The method provides a basis for testing the uprooting resistance of trees. This may be of

The application of the static integrated approach for ...

Tea trees are kept in shaded locations to increase their chlorophyll content, which influences green tea quality. Therefore, monitoring change in chlorophyll content under low light conditions is important for managing tea trees and producing high-quality green tea. Hyperspectral remote sensing is one of the most frequently used methods for estimating chlorophyll content.

Plants | Free Full-Text | Non-Destructive Detection of Tea ... instrumental analysis and non-destructive analysis are two different issues. It would take a lot of time (and writing space) to make this clear. Thus, I recommend the following: send me your mail ...
